

Understanding BG Wealth Sharing Principles

The presentation emphasizes several core principles [\[00:10\]](#):

- **Following Rules and Procedures:** Partners need to understand the rules and follow the procedures to claim their benefits.
 - **Equality and Mutual Support:** The BG community promotes a culture of no discrimination or preferential treatment, focusing on equality and mutual support [\[01:34\]](#).
 - **Open Communication:** Partners can directly discuss team development, business challenges, or personal plans with their leaders or Professor Beard [\[02:39\]](#). The goal is to help more partners achieve high income, better management, and growth [\[02:50\]](#).
-

Claiming Dividends

The video outlines the process for claiming dividends [\[03:12\]](#):

- **Dividend Date:** For example, the dividend date for this month is October 19th [\[03:21\]](#).
 - **Claim Time:** You must claim your dividend within 48 hours of the dividend date (e.g., October 19th 12:00 a.m. to October 20th 11:59 p.m.) [\[03:36\]](#).
 - **Claim Method:** Send a private message to claim your dividend [\[04:25\]](#).
 - **Deposit Method:** Once claimed, your dividend will be automatically credited to your account [\[04:31\]](#).
 - **Overdue Processing:** If you don't claim your dividend within 48 hours, you will forfeit it based on established rules [\[04:49\]](#). It is crucial to claim within the 48-hour period [\[05:00\]](#).
-

Enhancing Communication

The importance of enhanced communication is highlighted for several reasons [\[05:24\]](#):

- **Identify Problems Promptly:** Communication helps identify issues like team management challenges, member attrition, and training gaps [\[05:35\]](#). It's not enough to invite a person; support and knowledge about BG and the cryptocurrency market are essential [\[05:54\]](#). This allows for prompt adjustment of strategies [\[06:08\]](#).
- **Share Successful Experiences:** Leaders who achieve results can share their experiences to help BG members avoid mistakes [\[06:13\]](#).
- **Activate Team Spirit:** Active communication helps new members integrate quickly and fosters a more profitable team environment [\[06:26\]](#). This creates a "virtual cycle" where new members are supported and engaged [\[06:35\]](#).

Getting Started with BG and DSG Exchange

Gaganskaria, a senior investment advisor, provides a step-by-step guide on starting with BG as an investment member and creating a DSG exchange account [\[13:02\]](#).

Disclaimer

Success with DSG exchange and BG wealth sharing depends on individual focus, determination, and ability to learn and share what Dr. Beard teaches daily [\[09:44\]](#). While Gagan can guide and coach, she cannot guarantee financial success, as it relies on individual understanding and knowledge in the crypto industry [\[10:09\]](#). However, Dr. Beard, as the founder and CEO of BG Wealth Sharing, guarantees fund safety and profit on every trade [\[10:39\]](#).

Step 1: Obtain a Referral Link and Code

You need a referral link and code from the person who invited you to be a BG community member to create a **centralized exchange account on DSG exchange** [\[13:25\]](#). BG Wealth Sharing acts as an investment advisor, not a financial advisor, meaning you manage your own assets and execute trades yourself [\[14:46\]](#).

Step 2: Create Your DSG Exchange Account

When you open the referral link, you'll be directed to the DSG exchange registration form [\[16:08\]](#). You can register using your email or mobile number, complete a captcha for human verification, and then create your username and account [\[17:33\]](#).

Step 3: Complete KYC Verification (Optional for Trading, Essential for Withdrawals)

While **KYC (Know Your Customer) is not required for daily trading**, it is necessary for managing, securing your account, and withdrawing profits [\[18:16\]](#).

- Click on the **home button** [\[18:41\]](#), then the **profile button** in the top left corner [\[18:48\]](#).
- There are two levels: **Basic Verification**, followed by **Advanced Verification** after 24 hours [\[18:53\]](#).
- A **soft KYC verification** layer was added recently for fund withdrawals [\[19:08\]](#). Verification is important for account security and future large trade accounts [\[19:46\]](#).
- BG and DSG guarantee doubling your investment in under 60 days, assuming you follow instructions and execute codes [\[20:06\]](#). In case of a failed trade, a five-stage recovery process is in place [\[20:28\]](#).

Step 4: Fund Your DSG Exchange Account

After setting up your DSG exchange account, the next step is to fund it [\[21:17\]](#).

- **Currency:** You need a stablecoin called **Tether (USDT)**, which is pegged to the US dollar (1 USDT = \$1 US) [\[25:21\]](#).
- **Budget:** Decide your initial funding budget (e.g., 500 USDT, 1000 USDT) and add an extra \$50 to cover conversion rates, transaction fees, and gas fees [\[25:38\]](#).
- **Acquiring Crypto:** You can get crypto through exchange accounts (recommended for North America/Canada), or your referrer can guide you [\[26:07\]](#).
- **Network:** You need **USDT TRC20** (Tron network) or **USDT ERC20** (Ethereum network) [\[26:54\]](#).
- **Deposit Process:**
 1. Click on **Assets** at the bottom of your DSJ exchange account [\[28:31\]](#).
 2. Click on **Deposit** [\[28:50\]](#).
 3. Obtain your wallet address (similar to a bank account) [\[29:08\]](#).
 4. Ensure it's **USDT** and the network is **TRC20** or **ERC20** [\[29:14\]](#).
 5. Scan the QR code or copy the wallet address to send money to your DSG exchange account [\[29:22\]](#).
 6. **Optional:** If you have other cryptocurrencies (e.g., Bitcoin, Ethereum), you can use the **Convert/Swap** feature to change them to USDT before transferring to the trade account [\[29:36\]](#). Money *must* be USDT to go into the trade account for the system to recognize you as a new member [\[33:29\]](#).

Step 5: Transfer Funds to the Trade Account

Once your funds are in the exchange account (and converted to USDT if necessary), transfer them to the **trade account** [\[35:15\]](#).

- The **exchange wallet** is for deposits and withdrawals, while the **trade wallet** is connected to BG and used for trades with Dr. Beard's codes [\[31:22\]](#).
 - You must **double your money** in the trade account before moving it back to the exchange account to avoid a 12% penalty [\[39:49\]](#).
 - To transfer, click on **Transfer**, select **Trade to Exchange**, enter the amount, and confirm [\[40:05\]](#).
-

Executing Daily Trades

After your trade account is ready, you can perform daily trades [\[44:34\]](#):

- Click on **Futures** at the bottom of the screen [\[44:37\]](#).
- Slide the screen up to find the **"Please enter the order code"** section [\[44:40\]](#).
- Copy the code from **Bonhat** (a free app for BG community communication) [\[21:32\]](#) and paste it here [\[44:48\]](#).

- Confirm the trade and let the AI execute it [45:18].
 - Gaganskaria has a 99.86% winning ratio with Dr. Beard's codes [45:35].
-

Daily Compounding and Growth

The video illustrates the potential for daily compounding [45:54]:

- Starting with 1,000 USDT and two codes a day, earning 1.3% daily, your investment can **double in under 60 days** [46:07].
 - In 12 months, that 1,000 USDT can become **over 100,000 USDT** [46:52].
 - If you build a team and qualify for a third permanent signal, earning 1.8% daily, the growth is even more significant [47:21].
-

Withdrawal Process

- DSG exchange charges a **12% flat handling fee** for withdrawals [39:09].
 - The minimum withdrawal amount is **35 USDT** [39:09].
 - Money must be in the **exchange wallet** (not trade wallet) to withdraw [39:16].
 - Withdrawals can take up to **24 hours** due to a manual soft KYC process, though in Gagan's experience, it's usually faster [41:57].
